APPROVAL DESIGN FOR TENT STORAGE SBT 4.1

PROJECT SHEET

PROJECT	Permit design for tent storage facility SBT 4.1
LOCATION	Semmering Base Tunnel, Austria
CLIENT	ARGE BTA Semmering Basistunnel 4.1
PERIOD	July - August 2025
DESCRIPTION	<p>The Semmering Base Tunnel is a 27 km long railway tunnel in Austria, and it is part of the European Baltic-Adriatic corridor. Currently the phase “tunnel equipment” is ongoing. The construction site equipment areas were established in close vicinity of the tunnel. For the storage of material, a tent with the dimensions $L = 22$ m, $W = 12.5$ m and $H = 7.6$ m was erected on one of the site equipment areas. As this tent is considered a building, according to the Styrian regional laws, an approval at the authorities had to be obtained. Schembera Consulting ZT e.U. prepared the necessary documents for this approval to all required local authorities, including the communication with the authorities.</p>
SERVICES	<ul style="list-style-type: none">• Approval process to all required local authorities.• Design for approval.
